The second impulso Armywarda, was caused by my receiving a letter from my "intended," then in England. She had always been greatly opposed to women preschera; but, somehow, we had evidently never come into conflict upon this subject, as I was a firm believer in their right to the platform and pulpit. However, in company with some friends. Miss Mandall went to Carbiels to see and hear the Army soon after its opening there, and after hearing the testimonies of some of the most notorious men and women, her prejudice gave way, and the gratitude of her heart flowed out to God for the work accomplished, even though lessies had been the agents. I thus received a full account of this visit, and became more and more interested.

But wherein I was most touched was when my younged brother errote from England to tail me he had been saved in an Army meeting in Pennish. Cumberland, and had become one of their bandsmen. My convictions new became thoroughly settled that the Salvation Army was a God raised up concern, and destined to be a mighty factor in His plan to save the world.

During all this, I was actively engaged in church work, and really busy in definitely pressing men into the Kingdom of Jesus Christ. About the time. I had also become thoroughly sanctified, and knew it, and the indisputable evidence, to me, was seen in the souls God helped me to win for Him. Without any knowledge whatever of how the Army conducted their meetings, it begun to have prayer meetings after every service I coaducted, whether morning, aftermoon, or night, and urged people to calvation, and let me say to the honor of Him, Whose servant I was, and am, that frequently I saw sinners esching asl-version. On one Sunday morning there were nine; on the amou evening, sic others. At an other place, few sunday work, starting a seven as m. I will be clearly seen, theref

A critical moment, however, arrived in my life, and while doing everything I wild for the Master, Whom I truly loved, an aunouncement was made that an Army

HALFPENNY Wer Cry, and a regged locking thing at thet, was the first particle of following thing at thet, was the first particle of following thing at thet, was the first particle of following thing at thet, was the first particle of following thing at the from Eagland to Christehurch, New Zealand, and had evidently been well handled and read before posting to the Antipodes. However, there it was, with all its peculiarities: "Kneedirll," "Blood-and-fire," etc., etc.; but what these I had no quarted to pick with words or terms, but dired to the contents of this funny paper, having learned the lesson that, tas the prospector notions the broken pieces of quart laying on surface, and argues from that to the possible wealth below, so I reasoned: "Maybe into of spiritual wealth is contained herein?"

I once heard Commissioner Howard say, "The spirit of a man moulds his work;" certainly, the spirit of that War Cry be gant to take hold of me in real current, and much I certainly, the spirit of the War Cry be gant to take hold of me in real current, and was hand speak about their first impressions of the Army, I never had my sensibilities and with what appeared ludicroup or irroverent, but at the very outset, seemed to

officer, (Captain, now Colonel, Pollard) was coming to Christehurch, and was going to stay with a friend of mime who had come out with him, and Lieutenaat (now Major) Wright, from Engiand.

It is friend had told use so much about these two salvation boys (as they called them these) that I was simply in a fever to see them and agreed with him that when he drove to the station (Christchurch) to meet Captain Pollard, he should call at the wasubouse where I was employed on him way back and let use have a look at this youthful salvation pioneer.

He did so, and on catching the first glance of the romewhat delicate looking face of Captain Pollard my heart went out to him in such love as I think must have bound the hearts of David and Jonathan together. I stepped up to the bagg, apposed his least francy, and after a few weeks of greeting, returned to the weak-house full of emotion and amazement.

That night was to be the first turn-out of

house full of emotion and anazement.
That night was to he the first turn-out of our little agreenive hand of workers, for a cort of march and sing in the street. It was not arranged because the Army Captain had come, but simply a development of our methods, having been arranged before knowing anything about his coming, but it was a happy co-incidence.

I asked the Captain to lead the open-air and show us how to do it.

"Shall I bring my concertins I" he saked.

"Oh, yes," I said, "do what you like." "On, yee," I seed, "do what you like."
So at the appointed hour we salked forth
from our little church in no such order an
two or four abreast, but just as we liked; a
little cleup of open air novices, anxious
to do good, and willing to learn how to do
to do good, and willing to learn how to do

We joined in nervously (at least I did) and them stopped at a street corner, while the Captain announced the meeting and invited sinners to corner, and also to come to Jesus. Oh, how beautiful I thought to be able to talk to sinners in the street like that, and then I stammered out sumething, feeling my own autwardness greatly.

In the indoor meeting the Captain spoke with—to me—thrilling effect, and yet in such amazing simplicity that I began to feel despair creeping over me about my sever becoming a costal speaker.

Oh, thought I, if only I can get my friend to consent to Captain Polised staying at my house to-night how happy I would be. (I was then married and cenfortably sattled down.)

He did consent, and that night I had the honor to entertain the first Salvation Army officer who over sleep in Christchurch. But he didn't aleep much, I assure you, fer I wanted to know wereything about it, that it was vary late (or early) before we retired, and then—ab! cruce me—I followed the Captain into his room, ast down by his bed, and wanted to know some more about the Army. (I can see now I was proparly captivated) Poor Captain I His head beneded low many a time, until fairly overcome, my questions were left unanswered and I had be retire.

A Primitive Methodist woman-preacher and I wave the only persons that took the platform with the four officers, and I was asked to speak, and I did so, with—to myself—exceptional liberty.

I attended the night meeting also, and, oh, what a row there was, until the excited, helf-demoniscal crowd brette up the proceedings in a meet inglorious luni-bub, and we all mede off with as good garee as possible. The roar of voices, and the rush and beatle of some 600 larrikins at the night of the Captain (who, with superil was marching armi-narm in a homeward direction, the attempt to put him in the River Aron, and the subsequent raid they made on some poor, defensedess Chinaman, when their hate had not got full want upon these modern specties, all hore heavily upon my heart, and only memed to get free when the hate had not got full want upon these modern apoeties, all hore heavily upon my heart, and only memed to get free with the or my wite.

I was responsible for giving some sort of answer to it.

I talked it over with my wife, who always seemed to be blessed with a vandier foveright than me, and also said, "Wall, if God wants us to pp, let m go." "Oh, best I'm not sare." I registed. "I want to be sure, and besties," I stepled. "We should have to sail the house, and square up this and the other." But how wooderfully God clears the ony for them who will obey Him. The "this and the other" begun to clear cut of the way in a remarkable fashion, leaving only the question of the house to sattle, and this I offered for cale at a price which was the utwood limit of the merrice I could well make at that times. Meanwhile, I wrote Captain Polland, offering ourselves (beby and all), and telling lim the cirvum-stances, receiving the answer that as soon as our way was clear, we hed to go to Demodife, (then headquarters.) I rabout a fortunght's time, a young men came into the warchouses and maid, "I'll take your house at your own price."

What a semantion passed through me at that momant, for the hest obstance had been removed, to our going, and it only remained for see to tell my wife, who had come 14,000 miles only about eavendam months before to share like I joys and acrows with me in our nice, cony, little house—tay of, but stop? To tell my little wife, who had come 14,000 miles only about eavendam months before to share like I joys and acrows with me in our nice, cony, little house—tay this is how I did it. On retearing from the city at night, I canteed the house singing, though comewhat saily, I dare may.

Ab I that spoke volumes, and at that moment we inseed the hulls to aloy our Lune, and shortly afterwards, on the very day the first New Zealand Wer Gry was issued, we left the fair City of the Paina to start our flavration Army career. This traview hours' train ride was mone too cheery. We had left very, very dear friends behind, and had come away against their approval, and, is same instances, in direct opposition to their strongest transcripe, but the call to our hearts was impressive, and we had swurn to our hunt that we would follow God.

Nearly sleves years have passed without one regent for having thus obeyed the voice of God. Our consecution is still complete, our purposes are one, and our love for soult away grows stronger as the needs of poor, lost humanity are presented to us while being led by the Spirit.

ET MAJOR READ.

A month to day since leaving Newfound-land, and here we are at Fort Arthur, the ex-treme eastern end of the Western Provincial limit. We thought it would be a good idea to stey ever on our way to Winnipeg, and we are sitting in Captain Zensie Milner's neat, little quarters as we do so. Fort William, another Salvation Army station, is four miller ditests, and we intend conducting meetings at both overse to night (Saturday), and all day Scaday.

Good news awaited us. Big knee-drills. One hundred and thirteen (113:1) last Sunday moraing. Crowded meetings. Lots of interest manifested. Townstolia believe in the Salvation Army and its principles. Yes, the Army has a hold on Port Arthur. Then Captain Hayes came in "pleading her cause at Fort William. Both officers had arranged a hig program for the week-und, intending to get an much work out of us an possible, an specials seldem visit these corps.

A few notes of the journey thus far may be acceptable and interesting to Cav readers: Dady Florence literally shriched a "Goodbye," and "Halletijsh" at the Union Depot as we left Toronto. Captain Edgecombs was there, too. What about Mother Florence? She was certainly all there.

"The circle corpe can be werked, and I am a great believer in it," said the Ensign, most suphatically; and he proved it by quoting two runniscinces re Fevertham. "But the higades must be visited, and the whole thing well looked after," continued the Brassbridge D. O. He looks well, and had lots of good things to say about his faithful officers and sidiers.

A broken bridge was the cause of a twe heart delay at North Eay. It was just a stilling minhes, but enough to prevent that lage C. P. R. engine from dashing on its way. Reader, have you a small broken bridge in your soul-experience? If no, be stavel i don't try to go sheed until the sero plane is heated, the flaw rectified.

Kindness is an excellent quality, "Kind weets can sever lie." Kind deeds are registered in heaven. We thought this se we sation? C. P. R. conductor doing all he could for the conduct and welfare of a yearsg mather who had four dear children classesing round har, coswing her much fatigue. "Do whet you can for her; she has had leds of could all night with those children; she made rote on much. I am leaving the train aw, but will see that the next conductor lowes out for her," said this guattlement, and link Read was able to render some assistance.

"Have a little of this Radway's Ready Relief," said the above less (Kratien, "I laways earry a bettle of it with me in case of surgueury. He addressed a woman who felt-way siet. What a coundrum is this caring for bedily weeks here than soul cravings!

"Would you like a mohe? It is a pipe," and a fashionably-dressed young man to a far flarm-haired boy, which are a strong thin wint strange thing he had become his flague. He might have more explicitly ex-plained the use of this stinking thing, and

also advised the dear little fellow to have nothing to do with it, but to ask the four-year-older if he wanted a smeke was very ungentlementy indeed and so nawise. Ah,

A deef and dumb girl ant man m on the car. With the sid of our fingers, we asked, "Are yes saved?" "Y. a.g.," was her sign answer. Going through various other hand and finger motion, we found out that she was going to Wilssippe to ber handled, the is award, at the baying the latter than the converse with her spiritually with our fingers. It was a now and elimit chai, but was very effectual.

At present, the program for Potr Axxien is as follows:—To night (Saturday), presentation of colors; to-morew (Sanday), 7 a.m. head-fill; 7 p.m., Salvalien meeting.

For Futz MILIAN:—Sanday, 11 a.m., helianan meeting; 3 p.m., presentation of colors; 7 p.m., falvalien meeting, with a colditure and courser's meeting at each corps. Then on Monday need we go on to Winnipeg, from which place we shall send more notes, with reference to our week-end battless at the above two places.

Though in the far West, we do not forget our dear comrades in Newfoundland, and shall centinually pray that God will keep even officer, soldier, and recruit true, first to God, then to the Army and its principles. Hallo-lojah!

The bast that can be said about this meeting in that after a hrave fight in the prayer meeting, four social exied to God for mercy. Many more were convicted, but left the building unsaved. The sight of sisners crying for mercy locatend things wonderfully, and we finished up about sleven o'clock, praising God for the predigal coming home.

Mext day Cap'ain Rice and mynelf made our way over to Carbonear, where we received a Newfoundland welcome from Captain Smook, Lieutemat Prittman and the commundon there. A large crowd assembled in the barracks at night, and we had a pood, red-hoof, advastion meeting, faithfully warning sinners of the danger they were ming should have been spent in crossing the barrace, but the storm was too great; the wind blow a regular burriane, and the prins fell its terrents. We had, therefore, the pleasuru of condecting the holiness meeting at Carbonear. God cane very near, and we had a blossed time. Praise God:

meeting at Carbonear. God came very near, and we had a blessed time. Praise God!

The Barrons are famous. The news of the difficulty experienced in going across has spread far and near.

Our countden at Heart's Content had been amounting the opening of their new barracks. We were determined to do all wa could not to disappoint them. So on Saturday morning we commenced the journey. We decided to p by a abent (!) read, and got about three miles est frees Carbonear, when we came to a river. The water had overflowed the banks and covered the bridge right over. The raise of the previews night had nected a lot of smow and ice, but the freet coming so sharp at high that freeze everything over with a thin crest. We were in a fit. To go forward we were almost sure to land into the river; and if we retraced our steps and took the other road we might find ourselves in the same difficulty.

After a little reconnoitering our driver decided to try the river. Two men came

of Conception Bay. Floating ion is plontiful. Along the beach are numbers of small heats, and the new familiar "fish-fishes." Lacking through the window on the other side, everything has a distinctly windry appearance. The hand is covered with a white coat; but the fir trees seem to bid definence to all, so they push their dark toge through the sarew, and form a contenst to all accumed. Young fisher-lade need us at the various stations, looking quite contenst with their between checks and happy faces.

After five hears' ride, I landed at Tilton and hand, owness ever to meet. m, bringing with him his fittle purely and sleigh (ex. perhaps, I sught to say the peny hewagit him.) Now for my first experience with case of these had-working little purely, which are need the working little purely which we need to the town and the same and the same in good of type, and he have been defined by the content of the wind, a carl had been heleted on the top of the load of word to haby the doct in this height little indeed to he will be seed of word to haby the doct in this height little indeed to he will be doct in the top of the load of word to haby the doct in this height little indeed line. After four months of their opportunities. After four miliediry with the sound we have been denoted to the top of the load of word to haby the doct in this height little indeed line. The mann of Bay Roberts has become famous. One many bernoke was almost full at night, and after a little time all stiffness were a month of a stiff wind, and after a little time all stiffness were a month of a stiff wind, and after a little time all stiffness were and we had a real blessed time. The prospects are very bright for Bay Roberts and alout shall yet ring with the mong of elvation.

Wednesday merning, hefore starting for Harber Groos, went ever to see the Glad

along at a very opportune moment. So with one man going aboad with a rope to try sed keep us seemwhere within the track, the driver at the hower bracks, and others harging ent the sleigh, the journey commenced. Unfortunately, however, before getting half way acrees, the ion pave way, and the poor howe was in four or five feet of water. This was meet inconvenient to say the least of it, especially as the westher was bitterly cold. However, after unithothing the horse in midriver we managed to get to the opposite shore. Our difficulty now was how to get the sleigh, with a trank of trade goods on board, over to the other side. With a little pulling and togging, however we managed this also, but set before getting pretty week, having to wade in ice and water. The weather heig go cold be water from the water from the weather heig go cold be water from the condition of the state of the same way and the condition water from the condition of the same way and the condition of the continued of the remaining eleven miles with wet cooks.

Once over the river we went forward speeding until reaching the half-way house. After that wing out a little we commenced again, Snow began to fall, the wind to blow, and before long we were caveleped in a snow-stown. Apart from this we got along wonderfully well, and landed in Heart's Content well award and happy.

Think of the position he has placed you in.
And yet you say, 'I cannot give up sin and

"A shalled son! won have noth-

And yet you say, 'I cannot give up an and its pleasures.'"

Ah! poor, deluded soul, you have nothing to give up: you are only foolishly throwing away God's greatest git—eternal life. Oh, that his blind eyes may be opened to see Jesus as his life, his light, his all in all!

We felt quite proud of our burrocks last Sunday night (and we think it was quite justifiable) Cleanliness, they say, is next to godliness; but our harracks was not only clean, but exceedingly presty. The pele green and bright red form a charming contract, and as the Captain usid, we caly want a few mottoes to make everything complete. The dishing room has also denned its spring dress; but not only is the room exceedingly bright and presty, but what is perhaps to some of our customers a macro important item, the bill of fare is most inviting. We accepted an invitation (or to be stretchy hences, we suggested it) the other day to dinner, and we were forcibly struck with the quality as well as the quantity of the mens. But while we are most anxious to make everything as comfertable and homelike as possible, we ever keep in mind that it is our mission not to aloue feed the hungry bodies, but to break the bread of life to their even more hungry souls.

the bread of life to their even more hungry souls.

Lieutenant Ross bids farewell to pots and pans, and introduces himself to bolts and bars. Many a prisoner in our juli and prison, will welcome him as a head of good tidings. He will visit them during their continement, and upon their discharge, will do all in his power to help them. Invite them to our Prison Gate Home; endeavor to obtain employment for them;—but above all, seek to lead them home to Jeeus.

Such work is most necessary. A prisoner is discharged; for perhaps six mooths he has been under the strictest discipline, but, at last he is free. His home is perhaps many miles away; it is true he has been given a ticket to his destination. But, as he steps out into freedom, he is seized with a sense of lonelinees; the disgrace of the past rises up before him; he has no true friend to whom he can turn for sympathy; but there is someone waiting for him, even at the very gate there stands one of his old chuma. Let's have jest check which was to have taken him home, is in many instances, pawned for drink, and in a very short time, before the sun of his first day has set, he is once more behind the iron bars.

But we love these poor, weak ones, and our sarnest prayer is, God increase that love, and we are going to try to help them, and arrange that upon their discharge, they shall find, not one of their old chumas, but a warm-hearted. Salvationist waiting for them, ready to cheer and help them, and lead them to pure and hely lives. God bless our commade as he, in God's strough, entern upon his new field of labor, and give him the joy of leeding many souls into liberty.

About three months ago, a poor, treambling soul sought Jesus in one of our Shelter meetings. In his case, as in all others, the promise, "Seek ye first the Kingdom of God and His rightecusness, and all these things shall be added unto you," was fulfilled, and work soon opened up. Although leaving the city, he was determined to be true to God—and connected himself with the Army—where he has ever since been fighting as a loyal soldier. He dropped in to see us the other day, and, as we saw his Army hadge and his bright smiling face, I heard his testimony to the saving and keeping power of God. Truly, our hearts rejoiced over another brand placked from the burning.

"You may have a rough voyage through life, but you have nothing to feer while you keep unbelief below, faith on deck, and Christ at the helm of your vessel."

On a barrow reef, under a tropical sun, with 700 miles of heaving waves between them and the measure civilization, was indeed a sorry position.

Ont of the live stock that had been about the ill-fated vessel, one little kid had messaged to escape. Everyone looked with pitying eye on the innocent little thing, but there was no alternative, it had to die to provide food. Then there was a sumsher of large ungainly birds that sat in rown along the reef, and which were so tense that they suffered themselves to be hilled without an effect to evenpe. In a few days, however, those left became shy, and finelly flow off to return no more.

When the tide was down, and the ship was only just subserged, the opportunity then offered was eaguly seized to get from the wreck anything portable. A keg of water was landed, and the allowance for each person fixed at three wine glassfuls a day. For five days they subsisted thes, till thirst reached almost a parcoyen. On tone occasion, when almost delirious, John George creyt round in the gloom of night to the water keg, and elading the drowny centinel, who was responsible to goard every drop of the precious fluid, removed the spile pag, and alsohed his huming thirst with a good, long draught. "I sever felt the thirst so bad after that, says George.

The dector, who had at one time been

the spile pag, and alacked his huming thirst with a good, long draught. "I never felt the thirst so bad after that," anyn George.

The dector, who had at one time been on a British man-o'-we, proved a saviour. He said that if they could get a big copper and a few other things from the wreck, he could construct a condenser, which would produce from the mit sea water all they would need for drinking purposes.

The labor involved was herculean, but it was for dear life, and every man did his utmost. In a few days, their efforts were rewarded in seeing the condenser completed, and the prospect of death from thirst postponed.

The next undertaking was to construct a heat big enough to held the party. To detail the many difficulties that were encountered and overcome would be monotonous. But a fine example of the value of co-operation was afforded in the result obtained; they dived under water, and manacked "The Jenny Lind," their vessel, of 1,003 tone, which had once or guily miled out of Plymouth; they steamed and beat them into ahape; they coulked the joints, and turned out quite a passable vessel.

All ware jubilant.

Then they leunched her. Alan, alsa! she rapidly illed, and would have sunk, had they not hauled her on to the rock with all speed. With all their ears, they found their workmanning very faulty, and in many places the verte found an entrance. This was disbeartening, but they were desperate. They would wait till moraing, as it was new late, then they would asse what could be done.

In the worning, it was found that through lying partially in the water, the timburs had evelled, and they might now venture on their 100-mile trip. With all speed, and very provision made that was possible under circumstances, they holated sail, and steered their boat for Moreton Bay, on the sect coast of Australia. Providence farowed them. Smooth sailing was experienced, and early one morning they found themselves in the neighborhood of the Bay.

•

Sailor are ingenious mean. George got transhipped south to Sydney, N.S.W., and got work as a cabinet maker at Transaine's, n Pite Street. From there he went north to Newcastle, as a builder. Here, while camping out, he learned how to make dam-per (bread), and Billy bea. Then he be-came stock-rider, becoming as nimble in mavigating his quadruped as he had been in steering a ship, and running aloft, or splicing a rope. He was certainly a man of many parts.

in stearing a ship, and running more, as splicing a rope. He was certainly a man of many parts.

About this time he revisited the old home in Occawal; he might have stayed there, but the free life of Australia unfits a man for the Old Country order of things, accordingly George returned to the place of which the Irish emigrant sings:

"They may there's bread and work for all, ... Link the sun shince always there."

But he had learned by now the truth of very ancient record, vir., "It is not good or man to be alone." Accordingly, he arried off with him this time one of the

dark-syed true-hearted daughters of Cornwall to grace the far-off Australian home. He reached his destination alright, and chose Glen Innes, in New South Wales, as his home. For a while all went meerily, but as even the bright alp of Australia in sometimes shrouded in pally blackness and tempestuous gloom, so was it to be with George. May be the prayers of the old Bible Christian couple were yet before the throne in great power, and though shipwreck and tempest had failed to ruch the steel-clast heart, the removal of his tenderest friend might. To confer upon her the crown of life might win him. the crown of life might win him

sees to Canada, still unconverted. "What hind of a husband was he, Mrn. George 1" I saked.

"Oh," said Mrn. George, "kind enough, only a slave to the drink."

Hard but true, the noble old soldier who had faced life's deagers by flood and falld, and whose hair was whitening with years, had gone down again hefore the drink, as esseny whose very subtilty had won him. He sat one night in the harneds at Bowsanville. Blessed be God for the living witnesses for Christ in the Army. That platform was a convince. The child of the old Bryanite preacher knew that it was no wild dire that had transformed those men. The arrow of truth piecoch him to the quick. He saw hisswelf a sinser. His position before him God rose up before him and glaved at him like aghost. He made his way to the door with a face like Judas likely had.

"Come on back, Johnny," said the implorting voice of a soldier. "No," was the reply.

But it sold the routed and once, and, says George, "I shouted, yes, and I did not care if all Bowmanville heard me." At last the old far could my:

### Christ's Sick Officers.

BY MARIA SIMPSON.

If any branch of Salvation Army work should more particularly engage our warm-est sympathy and ready help, surely it is the fund established for the relief of Christ's sick and wounded officers. They are Christ's indeed! Those who are ill and afflicted can usually count upon Christian love and sympathy ; how much more should this be the case with our noble Salvation Army officers, whose sickness and wounds are due to their devoted service for our King !

King!

Will Christians, of all denominations, please remember to contribute to this fund in special? Homes of Reet are helped from it, in various parts of our Dominion, and soore are imperatively needed. Many officers, after a period of well-earned repose, roturn to their posts strengthened anew for the war; but, of course, there are cases where Christ calls His faithful Captains and Lieutenants to promotion and glery in heaves.

Leutenants to promotion and glory in heaven.
Oh, comrades of our Army, and fellow-Christians of any and every church, let us do all in our power to contribute to this fund i Let Uhrist's stok officers have our fervent prayers, loving sympathy and substantial help "in the name of the Lord Jesus." Amen.—Hallelujah!

As a father, in a garden, stooped down to kiss a child, the absdow of his body fell upon it. So many of the dark misfortunes of our life are not God going away from us, but our Heavenly Father stooping down to give us the kine of His infinite and everlasting

#### Never Say Die!

BY BEN BRYAN.

Tune-New my die.

Tuste-New say die.

We are soldiers, bravely fighting,
And in the war delighting;
We are marshing on to war.
With the Saviour as our Leader,
Our courage ne'er shall waver,
We His valiant soldiers are.
In the Saviour's might,
We bravely fight,
Gaine the powers of sin and hell.
The' the fee fight hard against us,
They never can defast us,
We'll the powers of darknoss quell.

CHORES Never my die, etc.

Never asy dist, etc.
Oft the devil may distress us,
But God will never leave us,
While we put our trust in Rim.
And although the foe oppresses,
They never can defeat us,
Jebovah's mighty power shall re
We shall conquerrer be,
And the King shall see,
If we're fathful to the end.
Yes, we shall copy His faver,
And live with Him for ever,
In that bright and happy land.

We must be strong and courageous,
Our Saviour then will make us,
Conquerous over every foe.
He will never, never leave us,
But will the victory give us,
As we on to battle go.
Then when fighting's done,
And we're summoned home,
To that lead of light and love.
We will praise Him Who redeemed us,
Delighting in His Praises,
Wearing robes washed in His blood.

#### A CENERAL

Dr. Samuel Smiles, in his world renowned book, "Self-Help," tells a story illustrating the enthusiasm the presen of a good leader excites in the hour of apparent defeat. Muley Molue, a Moorish Prince, celebrated in the Spanish wars, and greatly beloved by his soldiers, had retired from the battle's front to die. The Moors, missing his magnetic presence and commanding figure, wavered in the fight, and gave way before the Spaniards on every hand. The news reached Muley Moluc dying in his tent, and gathering up the last few energies of his rapidly dissolving form he said, hoarsely, "Put me on my steed, and help me to the front."

When the Moors saw their whitebearded chieftain's form again, the word rang along the field, "Moluc is at the front, forward!" Then dashing with fresh energy at the foc they won the battle just about the time their own general breathed his last.

#### OUR GENERAL

Thank God, our General has not retired into his tent to die, neither are his troops wavering in battle; on the contrary, there is every evidence to show that the determined advance of the whole Army against the kingdom of darkness was never more whole-heartedly pushed than at present, while the illustrious example of the General is an inspiration to all. The coming of the annivorsary of the General's fiftieth year of service has been made the oceasion for another great forward charge of the forces in the United Kingdon

Amongst the objects, upon which the caergy of our fellow-soldiers there will centrated, are the enlistment of 1,000 field officers, the enrolment of 50,000 new Juniors. The opening of the Salvation Campaign in Java, Japan, and other countries, and the raising of a fund of 350,000 dollars for debt extinction and war extension purposes Towards this point, the General himself has donated a legacy of 100,000 dollars, which has recently been left him in an entirely unconditional way, and no doubt the forces in the Old Land will bring along the balance in the victorious style usual with them. We wish our General and British comrades God-speed in their great Jubilee effort.

CANADA, TOO.

We, in Canada, feel the inspi of the General's noble presence at the front of the War. The Commender who has just returned from the North West, with his faithful A.D.C., Briga dier Holland, declares we shall have the opportunity of doing something at this Jubilee time, to practically express on gratitude to God for continuing to m such a General, and giving the world such an organization as the Salestin Army.

The Commandant will unfold to m next week, a series of new plans in Canada, that will likely make the blod of every Canadian Salvationist ren la with enthusiasm. Our Canadian Wing has been making vigorous and some ful strides last year, but we are gaing eclipse all past results in 1894. Same to our noble Army, and especially the Canadian Wing; let every soldier continue to pray for an increased measure of blessing on all its operations, and shout ballelujah in anticipation of the coming victory.

It has been with almost impatient eagersees that we looked forward to the visit of our Communicant; therefore when Friday aight really came, although the rain was decoming, it did not prevent a good event of soldiers turning up for the march.

At 7:30, we started for "Chempbell's Corner," where a results open-sie was held, led by Hange Hills. She was amisted by Chaptains Remain and Collett. The Eighty-One-Ten Gian was exhibited, and the big drummer warned that if he did not beat that drum in correct time, he resuld be put sende it. It is hardly measurery to may that there was no consident for it to be put into practice, for our branch bead, under the leadership of Bandmarter Dunnan, in making splendid progress, although confronted by many dimárrantages. Adjutant and Mrs. Archibald were then introduced by the Commendant on behalf of the Victoria corpu. It was easy to see that overybody welcomed them into their hearts right away.

Our leader then proposed that everybody have a good sing, and Ensign Bilts was appealed to for a well-known cherms.

BY CAPTAIN W. J. PAYNE.

How is it that there are those who have taken upon them the name of Christ, who ravely if vere witness for Him? Does the bond of iniquity keep the month shut, or the jaws still, crippling the tongue on that it cenese to show forth His praise? If the above is not the case, as there are always exceptional cases, surely no one with a divine spark in them does regard it as an unnecessary thing to speak for Jesus, for he seward when people eases to work with God they must, of necessity, cases to live with Him, and they nuvisely place themselves where spiritual paralysis graspathem with the desperation of a blood-thirsty, ravescore beaut of pery.

An appeal has been issued for the purpose of raising a fund of £50,000 in order to colsbrate the jabiles of the Salvation Army. In connection with this jabiles, General Beeth purposed to inaugurate a four-months' Salvation Army compaign in Canada and the United States next autumn, the operations to be conducted by the General in person. The General also proposes an International Salvation Army Congress in July, and expeditions to Japan, Java, and Domeran. General Booth states that he has just received a legacy from a lady of £20,000, with which some, and the proposed £50,000, he intends to pay part of the Army's debt.

## Suffering of Temptation

I was much struck lately with und which says, Jesus "suffered, being tempted." Its had never cocurred to my mind bein, that temptation was no fering, real, istuas actual sufficiency, none the leas real hears unseen. The most intense suffering is not hypered, but either mental or mosinal; he fact, it has been doubted if there is not such a thing so physical suffering at all.

We talk, and sing, and think med of Jesus suffering on the Cross, of the them, the spikes, the spear, the scourging supping, sujiting thirst, loss of blood, fainness and death—wild exough. Yes, like ter, truly awful they were, and our bests aymapakine with Him, and love Him at their scoomst; but I do think few of medicate in themse and awful suffring of temptation endured by Him these forty days in the wilderness, tempted of the devil.

A murderer suffers more real pain and anguish in his mind long ere he reches the nonfold, than when standing pisionel, with the rope round his mock, and the black capower his face, listening to the meers fal sound of the minister's repetition of the Lord's prayer. Oh, yes, he has falt the hitter pangs of it all, days and wesh before, alone in his cell.

PARLIAMENT BUILDINGS .- Main Block.

The hard to know where to begin, and possibly, where to leave off. The very picture of the post office, with the dear old clock (which had a way of pointing toward eight o'clock iong before we wanted it to), and the equate in front, will always touch a chord in my heart. What bleemed, beautiful, never-to-be-forgotten times we had there to be care! And the crowds that word to gather! Why, sometimes we would—my little Captain and I—be almost shouting "Glory" for very joy, as we thought of our wonderful privileges.

Whilst I write, memory flashes back to one seamers' evening, when a poor, weary wanderer, a man sunken deep in sin, kneit at the drumhead to seek for pardon. How we prayed with him, kneeling beside him there for nearly an hour. He has had victories in many ways since that night. Halleligiah!

Now whilst away from the whirl and rush of the battle's front for a season, having, as it were, breathing space to stand and look, instead of being actively engaged in the fight, how glorious our warfare seems! Ah, we do not one quarter value our privileges as being co-workers together with Him, "Who loved us and gave Himself for ne."

Step by step Jesus led me. The crooked places were made straight, the rough places plain, and at leat the call came—came unmistakable—for has He not said, "My sheep know My voice?" It was not hard to

Have I ever regretted obeying Him, do you set? Am I disappointed in Jesus, or in my work? No, no, never I live Him more devotedly, and the work? It is my life, desure than any earthly joy could possibly be.

You, who are standing shivering upon the brink of a glorious life of power and victory—who have within your very grasp opportunities that the angels would rejoice in possessing—don't be atraid to venture out on God's promises, His everlasting arms will be around you, His voice even now is whispering in accents of love, "Tis I, be not afraid." #### Critics Disagree.

It is a very common mistake to assume that the Higher Criticism implies definite results, which all modern students of the Hebrew Bible who use the scientific methods of study, accept as true. This is an erroneous notion. Among the Biblical scholars who are critically studying the questions about the author-hip and dates of the books of the Bible, there is as much diversity of opinion as there is among theologians about the doctrines of the Bible. As we would not prohibit theologians from studying to find out what the Bible teaches, because of their different conclusions, neither would we prevent or condemn the critical study of the Scriptures, because of their differents, because of the critics. It temember this also: Everything that claims to be the result of scientific criticism is not "pure gooped."

#### KEEP BUSY.

The secret of success in life is to keep busy, to be perserving, patient and untiring in the pursuit or calling you are following. The busy ones now and then make mistakes, but it is better to risk these than to be side and insetive. Keep doing, whether it be at work or seeking recreation. Motion is life and the businest are the happesst. Cheerful, active labor is a blessing. An old philosopher says: "The fire-fly only chines when on the wing; so it is with the mind; when once we rest we darken."
